Offers FREE consultations to help determine if you're a good candidate for laser vision surgery (LASIK, Custom LASIK and Bladeless LASIK).

To ensure the best possible results from laser eye treatment, we are able to treat most people over 18 years of age who have had a stable prescription for 12 months. Prior to laser eye treatment being undertaken, you will attend a consultation with an Express Laser Trained Optometrist who will determine your suitability for treatment based on your personal prescription, healing profile and expectations.
